Re: 10 CFR 50.90

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Gentlemen:

Millstone Nuclear Power Station, Unit No. 2
Large Break LOCA/ECCS Analysis

In a letter dated June 3, 1988,⁽¹⁾ Northeast Nuclear Energy Company (NNECO) submitted to the NRC Staff a proposed schedule for various reports and analyses supportive of Millstone Unit No. 2's Cycle 10 reload. The Cycle 10 start-up is currently scheduled for March 1989.

In support of the proposed schedule, NNECO hereby submits, as Attachment 1, the Large Break LOCA/ECCS Analysis provided by Advanced Nuclear Fuels. This analysis was originally scheduled to be submitted on November 15, 1988. However, due to concerns expressed by the Staff of potentially insufficient review time, NNECO has been successful in condensing our original schedule for this analysis package.

Please contact us if you have any questions regarding this information.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

E. J. Mroczka
Senior Vice President
