Subject: Waterford 3 SES
Docket No. 50-382
License No. NPF-38
Revised Technical Specification Change
Request NPF-38-207

Gentlemen:

By Letter W3F1-98-0033 dated July 2, 1998, Entergy, on behalf of Waterford 3, provided Technical Specification Change Request (TSCR) NPF-38-207. This request provided revised ACTIONS 19 and 20 for Table 3.3-3 for the Functional Unit 7 "Emergency Feedwater," Items b and c.

On May 19, 1999, Entergy discussed this change with Mr. Chandu Patel of the NRC Staff. Based on this conversation, Entergy is committing the attached revised pages to replace Attachment C in its entirety in the original TSCR. The changes to ACTION 20 delete the word "requirement" and revise the word "MODES" to "MODE(S)".

In addition to the changes identified by Mr. Patel, Entergy has identified the following revisions to the TSCR:

The abbreviation for Feedwater Line Break is being changed from FLB to FWLB for consistency with other TS Bases.

This TSCR changes the Steam Generator Level Functional Unit of Emergency Feedwater to ACTIONS 19 and 20. Thus, ACTIONS 13 and 14 no longer apply to Steam Generator Level. Therefore, ACTIONS 13 and 14 are being deleted from Steam Generator Level by this revision. ACTIONS 13 and 14

continue to be applicable to the Functional Units of Safety Injection, Containment Spray, Containment Isolation and Main Steam Isolation. Steam Generator Pressure Low continues to be applicable to some of these Functional Units, so it is being retained in ACTIONS 13 and 14.

Miscellaneous typographical errors on existing pages, not related to this change, are being corrected.

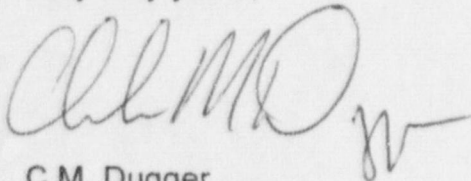

Some of the Bases statements are being rephrased for clarity.

A Bases change regarding the Reactor Trip Circuit Breakers transmitted to the NRC Staff by Letter W3F1-99-0093, dated May 20, 1999 is also included in this change. This change has been evaluated pursuant to 10CFR50.59 and has been determined to not involve an unreviewed safety question. This change has been reviewed and approved by the Plant Operations Review Committee.

Since these changes are editorial in nature, Entergy has concluded that this change is bounded by the No Significant Hazards Consideration Determination submitted in the July 2, 1998, license amendment request. Therefore, the original No Significant Hazards Consideration Determination continues to be applicable.

Should you have any questions or comments concerning this request, please contact Curt Taylor at (504) 739-6725.

Very truly yours,

C.M. Dugger
Vice President, Operations
