SUBJECT: AUGUST 12, 2003, CLOSED MEETING SUMMARY: U.S.
ENRICHMENT CORPORATION FINANCIAL QUALIFICATIONS FOR
LEAD CASCADE FACILITY

On August 12, 2003, staff from the U.S. Nuclear Regulatory Commission (NRC) met with staff from the United States Enrichment Corporation (USEC) in a closed meeting to discuss financial qualification information included in the proprietary portion of USEC's license application for the gas centrifuge uranium enrichment test and demonstration facility (Lead Cascade). The list of attendees is attached. USEC had submitted its Lead Cascade license application to the NRC on February 12, 2003. At the meeting, NRC requested USEC to provide additional information concerning its financial qualifications to safely operate the Lead Cascade facility. USEC agreed to address the requested additional information in its response to the NRC's Lead Cascade request for additional information (RAI) letter dated July 17, 2003. The NRC anticipates USEC to respond to the July 17 RAI by the end of August 2003 or early September 2003. At the meeting, USEC also inquired about NRC's annual fee for the Lead Cascade facility. NRC staff indicated that the annual fee for the Lead Cascade facility will be based on various factors including the safety/safeguards risks associated with the facility and that the NRC would address this matter internally.

Docket: 70-7003
