

RIC 2001

SESSION W17 - DECOMMISSIONING

LTP LESSONS LEARNED

Larry Camper, Chief
Decommissioning Branch
Division of Waste Management, NMSS
3/14/01

LESSONS LEARNED

- Early and frequent consultations are needed
- Operational environmental monitoring of groundwater may be inadequate for site characterization
- Design of the final survey must involve the application of appropriate data quality objectives

LESSONS LEARNED

- In-process inspections are more efficient than a one-time confirmatory survey
- Continuous dialog is needed to take advantage of the inherent flexibility in MARSSIM
- Derivation of cleanup levels should include the assumptions & justification for parameters used

LESSONS LEARNED

- A clear relationship is needed between the planned decommissioning activities and the associated cost estimate
- Old records are often inadequate or inaccurate
- Environmental impact reviews need to address non-radiological impacts
