### Emergency Preparedness and Response

We prepare for emergencies before they happen to simplify the decisionmaking process. Our emergency preparedness programs enable emergency personnel to rapidly identify, evaluate, and react to a wide spectrum of emergencies, including those arising from terrorism or natural events such as hurricanes. We ensure that the NRC and its licensees protect the public health and safety in any event involving an NRC-licensed facility or radioactive materials. In such an emergency, we cooperate with other Federal, State, and local emergency organizations. The NRC's [Office of Nuclear Security and Incident Response](#) (NSIR) has the primary responsibility for these essential agency functions.

- [Response to Terrorism](#)
- [Use of Potassium Iodide](#)
- [Response to "Dirty Bombs"](#)
- [Emergency Exercise Schedule](#)
- [Research & Test Reactor Preparedness](#)
