## **NRC PROPOSES \$4,800 FINE AGAINST VIRGINIA FIRM FOR VIOLATION OF NRC RADIOACTIVE MATERIAL SAFETY REQUIREMENTS**

The Nuclear Regulatory Commission staff has proposed a \$4,800 civil penalty against Eastern Isotopes, Incorporated, of Ashburn, Virginia, for violation of NRC safety requirements which resulted in a radiation overexposure to the hands of a nuclear pharmacist at a company facility located in Sterling, Virginia.

NRC officials said that the company violated its NRC license by failing to limit the annual occupational radiation dose to the hands of a nuclear pharmacist for a period from January 1, 2001, through December 31, 2001, to a required 50 rem limit. The NRC said the pharmacist received the majority of a dose of approximately 127 rem to the right hand and approximately 86 rem to the left hand in September and October of last year due to mishandling of radiopharmaceuticals.

The NRC retained the services of a medical consultant and concluded that it is highly unlikely that the dose received by the pharmacist resulted in any significant health effects and that the company's corrective actions have been adequate. However, NRC officials said the violation was characterized as a Severity Level 2, the agency's second most serious, due to the fact that an employee was exposed to more than two times the regulatory limit and a potential was created for what could have been, under different circumstances, a significant hazard to the pharmacist or other company staff.

The company has 30 days from receipt of the NRC Notice of Violation to either pay the civil penalty or to protest its imposition, in whole or in part.

Members of the public may obtain copies of the letter from the NRC to the company from the Region II public affairs office on the Internet at [OPA2@nrc.gov](mailto:OPA2@nrc.gov), by calling the Region II office at (404) 562-4416/4417 or from the NRC Internet Web Site at [www.nrc.gov/reading-rm/ADAMS.html](http://www.nrc.gov/reading-rm/ADAMS.html) (the public electronic reading room).
