Subject: Error Notification

Dear Sir/Madam:

Per Part 21, "Reporting of Defects and Noncompliance", and per our in-house Quality Assurance Procedures, enclosed please find Phi-Delta, Inc. (PD STRUDL) BER Report Nos. B6.0-101, B6.0-103 and B6.0-105.

PD STRUDL is a software program that is used by many Architectural and Engineering (A&E) firms and electrical utilities for the Analysis and/or Design of structural components in a nuclear power plant.

We have already notified all our known users of the error.

Please note that the signed Certified Mail Receipt will be used as the acknowledgement that you have received this notice.

Should you have any questions or need more clarification, please do not hesitate to contact this office, Via Phone (781) 834-5279, or via Fax (781) 834-5281 or via E-Mail at PHIDELTA10@AOL.com.

Thank you.

Sincerely,

Som P. Vish / for WSH

Wassim S. Habib

PHI-DELTA BUG/ENHANCEMENT/ERROR REPORT
(BER)

BER REPORT NO. **B6.0-101**

APPLICABLE PROGRAM PRODUCT:

PD STRUDL _____   E/PD STRUDL _____   OTHER _____ ALL: **X**

REPORTER: **PD, WSH** _____ DATE: **12/19/2007**

RECORDER: **PD, SPV**_____ DATE: **12/19/2007**
PLATFORMS AFFECTED: ALL: **X**   IBM: ___ VAX: ___ PC: ___

OTHER (IBM RISC, SGI): _____

VERSION(S) AFFECTED: **1980 Onwards**
(if an enhancement, complete at time of release)

DESCRIPTION:
For the following Steel CHANNEL Sections, shear center eccentricity (EZ) was incorrectly stored in the tables and used by STRUDL:
   a) STEELMC – 1969 onwards
   b) STEELMC1 – Customized version of 1969 STEELMC tables, applicable only to one costumer. The affected customer is notified through the cover letter accompanying this BER.
   c) STEELC – 1980 & 1989

The EZ value stored in the tables and used by STRUDL was always smaller than the correct value. The bug has been corrected in Version V0707.

IF A BUG,

OTHER (IBM RISC, SGI): _____

VERSION(S) AFFECTED: **1983 Onwards**
(if an enhancement, complete at time of release)

DESCRIPTION:
Welding properties for the TABLE configuration were incorrectly computed for the composite sections (DOUBCHAN, DOUBTEE, LDOUBANG, SDOUBANG, STARANGL and DSTARANG).

The computed properties were always smaller than the correct values. Therefore the results were always conservative.

The bug has been corrected in Version V0707.
