PART 21 - POSSIBLE WELD ROD CERTIFICATION ISSUES

"On March 3, 2011, an audit of one of Fisher Control's suppliers determined that weld rod certified by an ISO process (instead of ASME) might have been used for weld repair of castings intended for nuclear service. Fisher and the supplier are in the process of reviewing all orders affected by this issue and have yet to find any that used the subject non-confirming material

"Fisher expects to complete this evaluation by August 26, 2011. At this time, if the review determines that a failure to comply condition exists, Fisher will issue notification per the requirements of 10 CFR 21.21(b)."

Subject: Possible Weld Rod Certification Issues Interim Notification

Fisher Controls is providing this interim notification per the requirements of 10CFR21.21(a).

On March 3, 2011, an audit of one of Fisher Control's suppliers determined that weld rod certified by an ISO process (instead of ASME) might have been used for weld repair of castings intended for nuclear service. Fisher and the supplier are in the process of reviewing all orders affected by this issue and have yet to find any that used the subject non-conforming material.

Fisher expects to complete this evaluation by August 26, 2011. At that time, if the review determines that a failure to comply condition exists, Fisher will issue a notification per the requirements of 10CFR21.21(b)

A handwritten signature in black ink, appearing to read 'Bill Fitzgerald', written over a horizontal line.

Bill Fitzgerald
