10 CFR 21.21

December 18, 2013

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555-0001

SUBJECT: CLOSURE OF INTERIM 10 CFR PART 21 REPORT REGARDING DEVIATIONS OF SUPPLIED MATERIALS FOR MODULE ASSEMBLY

By letter dated October 15, 2013, CB&I submitted an interim report in accordance with 10 CFR 21.21 pertaining to the identification of deviations associated with supplied materials for module assembly being supplied as basic components. The report stated that evaluation of reportability in accordance with 10 CFR Part 21 was not completed within the 60-day evaluation period due to misinterpretation of what constitutes "delivery" of a basic component for material being transferred from one supplier to another. The report also stated that evaluation of these conditions was expected to be completed by December 9, 2013.

Evaluation of the conditions identified in the October 15, 2013, interim report was completed by December 9, 2013. The conditions were determined to be not reportable in accordance with 10 CFR Part 21.

If you have any questions regarding this information, please contact Mr. Curtis Castell, Licensing Manager, at 980-321-8314.

Sincerely,

Don DePierro
