

APPROVED BY OMB: NO. 3150-0056

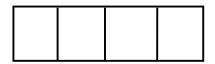

EXPIRES: 04/30/2027

Estimated burden per response to comply with this mandatory collection request: 360 hours. NRC is required to collect this information for reporting to IAEA from facility licensees appearing on the U.S. Eligible List. Send comments regarding burden estimate to the FOIA, Library, and Information Collections Branch (T-6 A10M), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by email to Infocollects.Resource@nrc.gov, and the OMB reviewer at: OMB Office of Information and Regulatory Affairs, (3150-0056), Attn: Desk Officer for the Nuclear Regulatory Commission, 725 17th Street NW, Washington, DC 20503. The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

## INTERNATIONAL ATOMIC ENERGY AGENCY DEPARTMENT OF SAFEGUARDS

## DESIGN INFORMATION QUESTIONNAIRE \*

IAEA USE ONLY

The purpose of this document is to obtain the facility design information required by the Agency in order to discharge its safeguards responsibilities. It will also serve as a checklist for examination of design information by Agency inspector(s). If, in any area, insufficient space is available add further shee ts to the extent necessary.

	ALL FACILI GENERAL INFO		
1. Name of the facility (include usual abbreviation)			
2. Location and postal address			
<b>3. Owner</b> (Legally responsible)			
<b>4. Operator</b> (Legally responsible)			
<b>5. Description</b> (Main features only)			
6. Purpose			
<b>7. Status</b> (e.g., planned; under construction, in operation; shut down; closed down; decommissioned)			
8. Construction schedule dates (if not in operation)	Start of Construction (MM/DD/YYYY)	Commissioning (MM/DD/YYYY)	Operation (MM/DD/YYYY)
<b>9. Normal operating mode</b> (days only, two shift, three shift; number of days/annum, etc.)			
<b>10. Facility layout</b> (structural containment, fences, access, nuclear material storage areas, laboratories, waste disposal areas, routes followed by nuclear material, experimental and test areas, etc.)	DRAWING(S) ATTACHED UNDER	REF. NOs.	
<b>11. Sitting of facility</b> (Maps showing in sufficient detail: location, premises and perimeter of facility, other buildings, roads, railways, rivers, etc.)	DRAWING(S) AND/OR MAPS ATTA	ACHED UNDER REF. NOs.	
<b>12. Names and/or titles and address of responsible officers</b> (for nuclear material accountancy and control and contact with the Agency. If possible attach organization charts showing position of officers)			

	OVERALL PROCE	SS PARAMETERS	
<b>13. Facility description</b> (indicating important items of equipment which use, produce or process nuclear material, all process stages, storage areas and feed, product and waste points as pertaining to the measurement, control and accountancy of nuclear material)		) ATTACHED UNDER REF. NOs. (T areas which contain nuclear material as	
<b>14. Process description</b> (indicating type of conversion, method of fabrication, sampling methods, etc., indicating also the modification of physical and chemical forms)			
<b>15. Design capacity</b> (In weight of principal products per annum)			
<b>16.</b> Anticipated annual throughput (in the form of a forward programme (if applicable), indicating the proportion of various feeds and products)			
<b>17. Other important items of</b> <b>equipment using, producing or</b> <b>processing nuclear material</b> (such as testing and experimental equipment)			
NU	JCLEAR MATERIAL D	ESCRIPTION AND FLOW	
18. Main material description		Intermediate product (powder, pellets, etc. separately stored or shipped)	Product
<ul> <li>Main types of accountability units to be handled in the facility</li> </ul>			
<ul> <li>ii) Chemical and physical form</li> <li>(for product include types of fuel element/assemblies, give detailed description indicating general structure and overall structure and overall dimensions of fuel element/ assemblies, including nuclear material content and enrichment). Attach drawing(s)</li> </ul>			
<ul> <li>iii) Throughput, enrichment ranges and Pu contents (for normal flowsheet operation indicating if blending and/or recycling takes place)</li> </ul>			
iv) Batch size/flow rate and campaign period, means of batch identification			
<ul> <li>v) Storage and plant inventory (indicating any change with throughput)</li> </ul>			
vi) Frequency of receipt or shipment (batches/units per month)			

N	JCLEAR MATERIAL DESCRIPTION AND FLOW	
19. Scrap material		
<ul> <li>20. Waste material <ul> <li>(including contaminated equipment, measured discards and retained waste)</li> <li>Describe for each waste stream:</li> <li>i) Major contributions (sources)</li> </ul> </li> </ul>		
ii) Types of waste		
iii) Chemical and physical form (liquid, solid, etc.)		
iv) Estimated enrichment ranges and uranium/plutonium content		
v) Estimated quantities per year, period of storing		
vi) Waste generated rates (as % of input/ throughput, quantities per month)		
vii) Store inventory range and maximum capacity		
viii) Method and frequency of recovery/disposal		
	DIAGRAM(S) ATTACHED UNDER FIG. NOs.	
21. Waste treatment system		
	DIAGRAM(S) ATTACHED UNDER REF. NOs.	
22. Other nuclear material in the facility and it's location, if any		
	DIAGRAM(S) ATTACHED UNDER REF. NOs.	
23. Schematic flowsheet for nuclear material (identifying sampling points, flow and inventory measurement points, accountability areas, inventory locations, etc.)		

	UCLEAR MATERIAL DESCRIPTION AND FLOW		
24. Types, form, ranges of nuclear material content (Including enrichment, as applicable), ranges of quantities of nuclear material flow for each nuclear material handling area, i. e.: process area storage area other locations (Also indicate maximum quantities of nuclear material to be handled in accountability areas at the one time.)			
25. Recycle processes	DIAGRAM(S) ATTACHED UNDER REF. NOs.		
(briefly describe any such processes giving source and form of material, method of storage, normal inventory, frequency of processing, duration of temporary storage, schedules for any external recycling, measurement method of fissile content of recycle material)			
<ul> <li>26. Inventory</li> <li>(within plant and equipment during normal operation; indicate quantity, range of enrichment, Pu content, form and principal locations and any significant change in time or throughput; indicate anticipated residual hold-up and mechanism, e.g. plate out, condensation)</li> <li>i) In-process</li> </ul>			
ii) Feed and product storages			
<ul> <li>iii) Other locations</li> <li>(quantity, range of enrichment, Pu content, form and location of inventory not already specified)</li> </ul>			
NUCLEAR MA	TERIAL HANDLING (FOR EACH ACCOUNTABILITY AREA)		
27. Containers, packaging and storage area description	DRAWING(S) ATTACHED UNDER REF. NOs. SEPARATE NOTE TO BE ATTACHED. Describe for feeds, products and wastes: the type and size of storage and shipping containers and packaging used (including nominal capacity and capacity for normal operation, and type of material); method of storage or packing, filling and emptying procedures, shielding; and any special identification features.		
28. Methods and means of transfer of nuclear material (describe also equipment used for handling of feed, product, waste)			
29. Transportation routes followed by nuclear material (with reference to plant layout)	DRAWING(S) ATTACHED UNDER REF. NOs.		
(			
<b>30. SHIELDING</b> (for storage, transfer and process area)			

International Atomic Energy Agency      PLANT MAINTENANCE      SEPARATE NOTE TO BE ATTACHED.		
31. Maintenance, decontamination, clean-out       SEPARATE NOTE TO BE ATTACHED.         Describing plans and procedures for decontamination and clean-out of equipment containing nuclear material defining all sampling and measurement points associated with: (In cases where clean-out and/or sampling is not possible, indicate how the hold-up of nuclear material is measured or calculated.)         i) Normal plant maintenance		
31. Maintenance, decontamination, clean-out       Describing plans and procedures for decontamination and clean-out of equipment containing nuclear material defining all sampling and measurement points associated with: (In cases where clean-out and/or sampling is not possible, indicate how the hold-up of nuclear material is measured or calculated.)         i) Normal plant maintenance		PLANT MAINTENANCE
ii) Plant and equipment decontamination and subsequent nuclear material recovery		Describing plans and procedures for decontamination and clean-out of equipment containing nuclear material, defining all sampling and measurement points associated with: (In cases where clean-out and/or sampling is not possible, indicate how the hold-up of nuclear material is

i) General	following headings:	

(This section should also state what general and subsidiary ledgers will be used, their form (hard copies, tapes, microfilms, etc.) as well as who has the responsibility and authority. Source data (e.g. shipping and receiving forms, internal transfer documents, physical inventory forms, the initial recording of measurements and measurement control sheets) should be identified. The procedures for making adjustments, the source data and records should be covered as well as how the adjustments are authorized and substantiated.)

ii) Receipts

(including method of dealing with shipper/receiver differences and subsequent account corrections; the checks and measurements used to confirm nuclear material content and the persons responsible for those determinations should be defined)

NUCL	EAR MATERIAL ACCOUNTANCY AND CONTROL		
iii) Shipments (products, waste, measured discards)			
<ul> <li>v) Measured discards (method of estimation of quantities per year/month, method of disposal)</li> </ul>			
vi) Retained waste (method of estimation of quantities per year, method and envisaged period of storage; indicate also possible subsequent uses of retained waste)			
vii) Unmeasured losses (indicate the methods used to estimate unmeasured losses)			
viii) Operational records and accounts (including logbooks, general ledgers, internal transfer forms, method of adjustment or correction and retention location, and languages; control measures and responsibility for records)			
<b>35. Features related to containment</b> <b>and surveillance measures</b> (general description of applied or possible measures in reference to floor plan or plant layout)			
<ul> <li>36. For each flow and inventory measurement point, and sampling points of accountability areas, identified in particular under Qs. 13, 23, 24, Give the following:</li> <li>For each measurement point fill in separate sheet.</li> <li>Number of measurement points: 1</li> <li>i) Description of location, type, identification</li> </ul>			
<ul> <li>ii) Expected types of inventory change at this measurement point</li> </ul>			

NUCL	EAR MATERIAL ACCOUNTANCY AND CONTROL		
<li>iii) Possibilities to use this measurement point for physical inventory taking</li>			
<ul> <li>iv) Physical and chemical form of nuclear material (including enrichment range, Pu content, and cladding materials description)</li> </ul>			
v) Nuclear material containers, packaging and method of storage			
vi) Sampling procedure and equipment used (including number of samples taken, frequency and rejection criteria)			
vii) Measurement/analytical method(s) and equipment used and corresponding accuracies			
viii) Source and level of random and systematic errors for feed, product, scrap, waste (weight, volume, sampling, analytical)			
ix) Calculative and error propagation techniques			
<ul> <li>x) Technique and frequency of calibration of equipment used, and standards used</li> </ul>			
xi) Programme for the continuing appraisal of the accuracy of weight, volume, sampling and analytical techniques and measurement methods			
xii) Programme for statistical evaluation of data from (x) and (xi)			
xiii) Method of converting source data to batch data (standard calculative procedures, constants and empirical relationships for feed, products in sub-accounting areas, waste and scrap)			
xiv) Means of batch identification			
xv) Anticipated batch flow rate per year			

NUCL	EAR MATERIAL ACCOUNTANCY A	AND CONTROL
xvi) Anticipated number of inventory batches		
xvii) Anticipated number of items per flow and inventory batches		
xviii) Type, composition and quantity of nuclear material per batch (with indication of batch data, total weight of each element of nuclear material and form of nuclear material)		
xix) Features related to containment- surveillance measures		
<b>37. Overall limit of error</b> Describe procedures to combine individual measurement error determination to obtain the overall limit of error for:		
i) S/R differences		
ii) Book inventory		
iii) Physical inventory		
iv) MUF		
	POST-OPERATION INFORMAT	ΓΙΟΝ
38. Decommissioning schedule dates	End of operations (MM/DD/YYYY)	Decommissioned (MM/DD/YYYY)
39. Facility decommissioning plan	PLAN(s) ATTACHED UNDER REF. NOs	
i) Key events of the decommissioning plan		
ii) Removal and recovery of nuclear material		
iii) Removing or rendering inoperable essential equipment		
OPTIONAL INFORMATION		
<b>40. Optional information</b> (that the operator considers relevant to safeguarding the facility)		
Signature of Responsible Officer		
Date (MM/DD/YYYY)
