U.S. Nuclear Regulatory Commission Attn: Document Control Desk Washington, DC 20555-0001

SUBJECT:

UPDATED INTERIM 10 CFR PART 21 REPORT REGARDING VARIOUS

CONDITIONS FOR V. C. SUMMER UNITS 2 AND 3 AP1000® PROJECT

This is an updated interim report in accordance with 10 CFR 21.21 pertaining to various conditions for components supplied for the V. C. Summer Units 2 and 3 AP1000® project. By letter dated December 8, 2016, WECTEC submitted an interim report that was based on information contained in forty-four (44) inspection reports. These inspection reports identified nonconforming conditions that require further evaluation. The interim report is identified as NRC Log No. 2016-69-00 and Accession No. ML16356A261.

While substantial progress has been made in resolving these items (21 out of 44 are resolved), additional time is needed to complete the remaining evaluations. It is currently expected that the remaining evaluations of these conditions will be completed by May 31, 2017. The items resolved to date have been determined to be not reportable.

If you have any questions pertaining to this information, please contact Curtis Castell, Licensing Manager, at 980-859-6373.

Sincerely,

David Durham President
