

UNITED STATES NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

April 07, 2021

MEMORANDUM TO: Craig Erlanger, Director

Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

FROM: Louise Lund, Director /RA/

Division of Engineering

Office of Nuclear Regulatory Research

SUBJECT: GENERIC ISSUE MANAGEMENT CONTROL SYSTEM REPORT

FOR THE SECOND HALF OF FISCAL YEAR 2020

Enclosed for your information is the Generic Issue Management Control System report for the second half of fiscal year 2020 covering the period from April 2020 through October 2020. The Office of Nuclear Regulatory Research is addressing this report of active generic issues (GIs) to the Office of Nuclear Reactor Regulation (NRR) because NRR is implementing the active GI. This report is also being provided to the other regulatory offices for information.

The enclosure summarizes the status, activities, and completion dates associated with each of these Gls. The following describes the significant activities that occurred during this reporting period for the active GI:

- The NRC has closed out GI-204, "Flooding of Nuclear Power Plant Sites Following Upstream Dam Failure." All required actions have been implemented by licensees, and the NRC has verified.
- The NRC staff has completed their review of the remaining seven plant seismic evaluations and is preparing close out documentation for GI-199, "Implications of Updated Probabilistic Seismic Hazard Estimates in Central and Eastern United States on Existing Plants."

The NRC provides more detailed information on each active GI on the GI Dashboard. The GI Dashboard is located on the NRC's internal Web site at http://gid.nrc.gov/Planning and on the NRC's external Web site at https://www.nrc.gov/about-nrc/regulatory/gen-issues/dashboard.html.

Enclosure: Summary Status of Active Generic Issues

If you have any questions regarding this report, please feel free to contact one of the points of contacts.
