11 October 2021

CLOSURE OF FORMAL EVALUATION – DC COOK O-RING

To: Document Control Desk, Nuclear Regulatory Commission
From: Thomas Yim, Nuclear Products Operations Team Leader, Flowserve Vernon NPO
Reference: RLCA09317; O-Ring - AEP-DC Cook Flowserve Pump Division, Vernon, CA, 90058;
Interim Letter dated 9 September 2021
Internal Reference: Docket Number – 99901369; Flowserve Pump Division, Vernon Ca, 90058

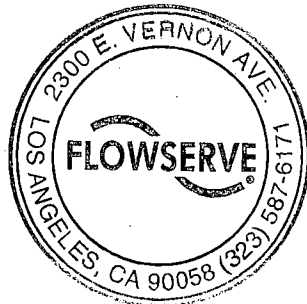

Subject: Advisement of Formal Evaluation;
Results of Evaluation by Flowserve Material Review Board: 10 September 2021

- This is to advise that the results of the Formal Evaluation of the referenced deviation had been conducted by the Flowserve Material Review Board in accordance with 10CFR21.21 requirements.
- This is to further advise that the results of that evaluation had concluded that the deviation involving an errant o-ring had no substantial impact to safety of the component or its operating system.

Accordingly, this deviation is now closed with no further action required.
