Executive Summary: The purpose of the Boot Camp is to inform Minority Serving Institutions (MSIs) of a broad range of funding opportunities that are available from various sources, including Federal agencies, public, private and corporate entities in the form of Grants, Contracts, Cooperative Agreements, Partnerships/Collaborations and other valuable resources. It will allow opportunities for these entities to develop work relations and unify private/public partners with MSIs to achieve common goals consistent with the nation's workforce development and diversity inclusion initiatives. The Boot Camp will serve as a vehicle to provide opportunities to expand support services to strengthen MSIs capacity to educate and train students; and to conduct research in the field of science, engineering law, information technology, and other fields NRC deems critical to its mission.
