NRC Chair and Commissioners to Host Public Meeting in King of Prussia on Nov. 16

The Nuclear Regulatory Commission Chair Christopher T. Hanson and Commissioners David A. Wright, Annie Caputo and Bradley R. Crowell will host a [public meeting](#) Nov. 16 in the agency's Region I Office in Pennsylvania to hear from NRC staff about regional activities and from several external stakeholders on their communications and interactions with the agency.

The Commission invited representatives of the following agency, organizations and companies to share their views and make a presentation: Connecticut's Department of Energy and Environmental Protection; the Indian Point Decommissioning Oversight Board; C-10 Research & Education Foundation; Constellation Energy; and Baxter Healthcare Corp.

A panel of NRC senior managers will brief the Commission on activities such as the agency's ongoing hiring initiatives, training, outreach to external stakeholders, inspection priorities and challenges, and support to states in the process of establishing programs to assume regulatory authority of nuclear materials used for medical, industrial and academic purposes within their borders.

The meeting is scheduled from 9 a.m. to noon on Nov. 16 at 475 Allendale Road, Suite 102, in King of Prussia, in the Market and Broad Conference Room. Members of the public can attend in person or watch live via [webcast](#).

The NRC Region I Office is responsible for conducting inspections at operating and decommissioning nuclear power plants in the Northeast and Mid-Atlantic. It also performs inspections to ensure the safe and secure use of certain nuclear materials in states within the Region that have not been delegated authority by the NRC to regulate these materials.
