## **NRC Issues Final Environmental Impact Statement for Turkey Point Subsequent License Renewal**

The Nuclear Regulatory Commission has issued a final site-specific [Environmental Impact Statement](#) – known as an EIS – for the subsequent renewal of the licenses for Turkey Point Units 3 and 4 in Florida.

The final EIS is based, in part, on a revised environmental report received from Florida Power and Light. The final site-specific EIS evaluates all the environmental impacts of continued operation of Turkey Point, Units 3 and 4 during the subsequent license renewal term.

The NRC's Atomic Safety Licensing Board is conducting a proceeding regarding the environmental review. Following that proceeding, the agency will make a final decision on extending the Turkey Point licenses into the subsequent license renewal term. Information about the Turkey Point subsequent license renewal review is available on the NRC [website](#).
