## **NRC Announces Opportunity to Request a Hearing for the Clinton License Renewal Application**

The Nuclear Regulatory Commission is announcing an opportunity for the public to request a hearing on a license renewal application from Constellation Energy Generation, LLC, for the Clinton Power Station in Clinton, Illinois.

Constellation Energy Generation filed the [application](#) on Feb. 14, seeking to renew the license from 40 to 60 years. Clinton's boiling-water reactor is currently licensed to operate through April 17, 2027.

The NRC staff has determined the application contains sufficient information for the agency to formally docket the application and begin its safety and environmental reviews. Docketing the application is not an indication of whether the NRC will renew the licenses.

The [notice](#) in today's Federal Register includes instructions for filing hearing requests. The filing deadline is June 17, 2024.
