

Common Attributes of Initial Recommendations
(Developed through the first Program Element Screening)

NRC/AS jointly develop agenda and priorities; horizontal communications

Use alternative available resources

Use Centers of Excellence/Expertise

Recognize current success, but supplement existing program with other options where enhancements can be achieved.

Reduce duplication of efforts (by accepting results of tasks performed by licensees and other entities in lieu of regulatory agency duplicating the efforts)

Use "clearing house" concept for collection of information

Consensus-driven

Shared responsibilities

Establish national priorities

Sharing resources

Common Attributes for NMP Oversight

Track or monitor Centers of Excellence/Expertise

Monitor progress of work products (those identified as NMP priority items)

Facilitate prioritization activities (scheduled meetings; ?annual as well as ad hoc for special needs?)

Monitor budget (if necessary)

Monitor resources; evaluate if all parties are providing balanced resources and whether all parties are participating to the extent required

Evaluate efficiency and effectiveness of the work activities and organization/program

Encourage participation when needed

Facilitate communication

Develop and maintain a mechanism to report back to stakeholders
