RE: Recycle rule (64 Federal Register 35090 June 30, 1999)

C  
ADJ

DOCKET NUMBER  
PROPOSED RULE PR 20  
(64FR35090)

Changing your rules to permit radioactive recycle into household and workplace items -- steel plate, ceramics, coins, etc., is completely insane. The synergistic effect of so many different sources of radiation will cause massive changes in the gene pool over the long run, and many more cancers, birth defects, still births, and sterility over the short (i.e., one human lifetime) run.

If you permit this you will be remembered as deluded fools who bowed to commercial pressures instead of standing up for public health and safety.
