To the members of the Nuclear Regulatory Commission:

OFFICE
OF
ADMINISTRATION

I write this in support of the two proposed rules concerning enacting limitations on employee hours at Nuclear Power plants and providing training on employee protection to supervisors, managers and directors. I believe the first rule will help prevent future accidents at Nuclear plants. These accidents could cause substantial damage to the environment as well as catastrophic loss of life. The second rule would prevent fear of reprisal from causing works to remain silent about safety problems. I hope you will give serious consideration to passing these rules. Thank you.

Sincerely,

Samuel C. Adams
