OF  
ADJ

Secretary Richard Meserve  
U.S. Nuclear Regulatory Commission  
Washington, D C 20555

DOCKET NUMBER  
PROPOSED RULE PR 20  
(64FR35090)

attn: Rulemaking and Adjudicating Staff

Dear Secretary Meserve :

We are very concerned about radio-active waste.

Please ask the NRC to isolate Radioactive waste and material or any contaminants of any level. The remnants of atomic weapons and energy production should be isolated from the public and the environment

The comment period by the consumers and public on releasing radio-active waste also into commerce should be extended for another year. Haste makes irreparable waste. Computers are not reliable enough to prognosticate the future.

Immediately stop the current methods of releasing

The longterm future is at stake

Sincerely,

E.V. Bluestein  
President
