December 21, 1999

Dear Chairman Richard Meserve:

It has come to my attention that through rulemaking 64 FR 35090 of 6-30-99 radioactive metals could be recycled into consumer goods. Please do all you can to stop this from happening. These materials should be contained and stored in a safe manner, never to be used again.

Thanks for your help.

Sincerely,
Bradford W. Berger, Ph.D.
