ATT: NRC Rulemaking and Adjudication Staff,

I am very concerned about the proposal to release more radioactive materials, especially into the marketplace, landfills, incinerators, etc.

Haven't you released enough radioactivity into our environment? I call on you to meet the responsibility for which our government was established, that is, to protect us. All I expect lately is for you to protect the interests of the rich who own radioactive interests. I call on you to prohibit the release of any level of radioactive materials, recapture what has already been released and halt ongoing releases. How could you risk the health of all of us on this earth!
