Subject: Re: proposed rule-making changes on "recycling" radioactive waste.

DOCKETED
USNRC

'99 DEC 22 A 9:03

To whom it may concern:

For many years I have studied the effects of radioactive ionized particles on the biosphere. I am in concurrence with world-reknowned nuclear science Dr. John Goffman, who firmly states that there is NO safe level of radiation, solid or gaseous, in our world's environment.

OFFICE
FOR
ADJUTANT

Therefore, I FIRMLY state to you, as the regulatory 'barrier' between the overburdened nuclear power/waste industry and myself, that you must IMMEDIATELY stop any effort to deregulate the control of nuclear waste to allow for it's amalgamated use with any other substance available to worldkind.

DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

Having survived the affects commonly associated with radiation in CANCER, I have no interest in seeing another death or injury due to the effects of radioactive waste.

I urge to stop this proposal now. For myself and the World....

What are your plans???

Most Sincerely,

Douglas Black

PDR PR 20 64FR35090
