SUBJECT: NRC INTEGRATED INSPECTION REPORT NO. 50-327/99-07 AND
50-328/99-07

Dear Mr. Scalice:

On November 20, 1999, the NRC completed an inspection at your Sequoyah 1 & 2 reactor facilities. The enclosed report presents the results of this inspection.

The inspection was an examination of activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations of activities, and interviews with personnel. Specifically, the inspection covered routine resident inspections and announced inspections by region based inspectors.

During these inspections, the NRC identified three issues of low safety significance that have been entered into your corrective action program and are discussed in the summary of findings and in the body of the attached inspection report. Of the three issues, one was determined to involve a violation of NRC requirements, but because of its low safety significance the violation is not cited. If you contest this non-cited violation, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region II; the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspector at the Sequoyah facility.
