

DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

DOCKETED
DATE

December 8, 1999

'99 DEC 22 AM 11

Nuclear Regulatory Commission
Washington, DC 20555

Office
of
ADJ

✓ Attention: Chairman
Rulemaking and Adjudication Staff

What is the Nuclear Regulatory Commission regulating? Your consideration of recycling radioactive materials along with regular materials could be considered a criminal act. The radioactivity emitted from the products thus created would increase the risk of cancer in the population, most especially in children.

I look to the NRC, the EPA and other such government agencies for protection, not agreement to introducing further possibly toxic elements into the environment. If there is any question of toxicity the practice should be denied.

Cancer is already prevalent here. To add more radioactivity into our surroundings is, I repeat, a criminal act.

A reply is requested.

Sincerely,
Frances Scafidi
