Secretary of the Commission  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-001

DOCKET NUMBER  
PETITION RULE PRM 30-62  
(64FR57785)

Dear Mr. Secretary:

I strongly urge passage of the proposed rule limiting the hours employees at nuclear power plants are permitted to work. This is extremely important in order to prevent errors due to fatigue.

I also urge that the proposed rule requiring nuclear plant owners to provide training for supervisors, managers, and directors on employee protection regulations. These regulations must be enforced.

Sincerely yours,

Beth J. Singer  
Professor of Philosophy Emerita  
Brooklyn College  
The City University of New York
