'00 JAN 12 P2:39

Dear Chairman Meserve:

I am writing to ask the Nuclear Regulatory Commission to please insist on isolation of radioactive wastes and materials and anything they contaminate, no matter at what level. The radioactive legacy of atomic energy and weapons production should be isolated from the public and the environment at all cost.

ADJ

The NRC should also extend the comment period on releasing radioactive waste into commerce to at least September 2000. This issue is too important to act hastily upon and it should be fully debated out in the open by the public. The public has spoken repeatedly before on this issue and needs time to be informed and debate the issue.

Sincerely,
Bruce Seitzer
