Attention: Rulemaking and Adjudication Staff

Gentlemen:

The very idea that you are already selling irradiated material for recycling to scrap metal dealers is anathema to any right-thinking person.

Will you be happy to eat food or handle objects that have been irradiated?

Have you been so brain-washed by those whose greed is immeasurable, to believe that any dose of radiation is safe? And have you the right to subject the public to such danger without giving them a choice?

Please tell me we are not yet an autocracy!!!

Sincerely,
Daniel B. Lebow
