Mr. James Knubel
Chief Nuclear Officer
Power Authority of the State of
New York
123 Main Street
White Plains, NY 10601

SUBJECT: INDIAN POINT NUCLEAR GENERATING UNIT NO. 3 RE: CLOSEOUT OF
GENERIC LETTER 97-06 (TAC NO. MA0920)

Dear Mr. Knubel:

On December 30, 1999, the U.S. Nuclear Regulatory Commission (NRC) issued Generic Letter 97-06 (GL 97-06), "Degradation of Steam Generator Internals." The purpose of GL 97-06 was to obtain information that would enable the NRC staff to verify that the condition of licensees' steam generator internals comply with and conform to the current licensing bases for their respective facilities.

By letter dated March 10, 1998, you responded to GL 97-06 for Indian Point Unit No. 3. The NRC staff's review of your response did not identify any new concerns with the condition of the steam generator internals. The NRC staff did not identify any concerns with the inspection practices employed at your facility to detect degradation of steam generator internals. The staff, therefore, concludes that your response to the GL provides reasonable assurance that the condition of your steam generator internals is in compliance with the current licensing basis for your facility.

The detailed technical basis that supports the staff's determination for all facilities will be published in a NUREG report. The expected publication date is February 2000. This completes the staff's action on TAC No. MA0920.

Sincerely,

/RA/

George F. Wunder, Project Manager, Section 1
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket No. 50-286
