

The Honorable Joe L. Barton
Chairman, Subcommittee on Energy
and Power
Committee on Commerce
United States House of Representatives
Washington, DC 20515

Dear Mr. Chairman:

The U.S. Nuclear Regulatory Commission (NRC) is amending its regulations containing the list of approved spent fuel storage cask designs to indicate that Amendment No. 1 has been issued to Certificate of Compliance (CoC) No. 1004. CoC No. 1004 is modified to: (1) change the name of the person who submitted the Safety Analysis Report (SAR) (i.e., name of the certificate holder) to "Transnuclear West, Inc."; (2) change the title of the SAR to "Final Safety Analysis Report for the Standardized NUHOMS Horizontal Modular Storage System for Irradiated Nuclear Fuel"; (3) change the expiration date for this certificate to "January 23, 2015"; and (4) add a new line of text stating the applicability of Amendment No. 1. This cask design, when used in accordance with the conditions specified in the CoC and NRC regulations, will meet the requirements of 10 CFR Part 72; thus, adequate protection of public health and safety is ensured.

Sincerely,

Dennis K. Rathbun, Director
Office of Congressional Affairs
