DOCKET NUMBER  
PROPOSED RULE PR 20  
(64FR35090)

Dear Chair Dicus:

I am writing you about your plans to recycle radioactive nuclear waste metals into various common products.

I defy you to find anyone who would welcome orthodontic braces laced with radio active metals in his mouth, or a housewife who would use a frying pan glowing with radioactive metals, or a mother who wants to push a baby carriage with radioactive metal wheels.

How could you even conceive of such a project? Are you putting labels on these products so we will all be sure to know?

Sincerely,

*Barbara Visser*  
Barbara Visser
