Subject: Re: The West Valley Project

January 7, 2000

Dear Mr. Parrott,

I would like to express my feelings and concerns regarding closure of the West Valley site. I would hope that the N.R.C. would know that ALL watershed s and water tables in this area are interconnected -- and therefore, impacted by the West Valley situation. Living in a nearby area (town of Wales) which is entirely dependent on well water, I feel strongly that all waste at the West Valley site should be completely exhumed and removed from the site . As you know, this area is sitting on a major fault. To leave this site and any stored waste on it to "happenstance" is just plain ludicrous! The most sane, sensible and cost-effective way to go in the "long run" is to "completely exhume and remove".

Sincerely,

Judith Peterson
