

March 23, 2000
LD-2000-0022

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555-0001

Subject: **Submittal of CD-ROM of System 80+™ Design Control Document,
Docket 52-002 (Non-Proprietary Information)**

Reference: Letter, C. B. Brinkman (ABB) to U.S. NRC, "System 80+™ Design
Control Document," LD-97-014, 4/30/97.

Enclosed is a CD-ROM of the ABB C-E Nuclear Power, Inc., System 80+ Design Control Document. This CD-ROM is forwarded pursuant to a request by J. N. Wilson, NRC System 80+ Project Manager, for inclusion in ADAMS as an electronic copy of the paper version submitted via the reference letter.

This version of the Design Control Document is that which forms the basis for the System 80+ final design certification rule published in the Federal Register on May 21, 1997. Note that the CD-ROM includes an Envoy viewer for navigating and display of the WordPerfect 5.1 source files used to create the Design Control Document; Acrobat (".pdf") viewers were not compatible with the source files.

Please feel free to contact George Hess of my staff at 860-285-5218 or me if you have any questions.

Sincerely,

Ian C. Rickard, Director
Nuclear Licensing
