StreetNumber: 2

StreetName: Stuidawaeg

City: Wolfenschiessen

State: Nidwalden

ZIP: CH 6386

Country: Switzerland

Affiliation: Critic of Switzerland's NAGRA plans, LL,ML waste repository project Wellenberg.

Comments: Switzerland's Nuclear Power Industry is contractionally bound to MOX production in France (La Hague) and England (Sellafield). These installations pollute the seas and the environment radioactively. They also create great amounts of new atomic waste HL,ML and LLevel. Up to now I have been proud that the US did not follow this dangerous path, please keep it that way, nuclear power has no future and a last minute MOX technology brings economically less when weighted against the environmental impact.
