Gentlemen:

The Annual Radioactive Effluent Release Report is hereby submitted in accordance with the requirements of Reference (1). This report also contains the information required by References (2) and (3).

This report is considered a single submittal for the two unit site. This report combines those sections that are common to both units at the site. However, where the two units have separate radwaste systems, the report does specify the releases of radioactive material from each unit. In reference to this, Unit 1 and Unit 2 have shared radwaste systems for gaseous elevated releases and for liquid releases. The report format is summarized in the index.

There were no abnormal liquid or gaseous releases during the report period.
