Subject: Recycling radioactive contamination

DOCKETED
USMRC

'00 APR -4 P2:36

Just how stupid can government/corporations/scientists/people get???? Isn't radioactive waste bad? Isn't the half-life in hundreds and thousands of years---not months but years!!!! Aren't we/you supposed to be stewards of the earth, the future, our children and their children. Just how can you "set standards" for tolerable levels of recycled radioactivity and still have a conscience, a concern for the future?

If I am for myself alone, what am I?

If not now, when?
