SUBJECT: Shut Down the Indian Point Nuclear Reactor

[Message]

As citizen, mother, and faculty member of John Jay College of Criminal Justice where I am studying Science and Technology with my Writing class this semester and as a terrestrial creature, I am writing to ask that, via Executive Order, you have the high risk Indian Point nuclear reactor shut down, without delay to help protect the health and safety of living things near and far. When there are a number of say, renewal and even very low cost energy alternatives, it is idiotic that localities become dependent on high risk nuclear technologies. The potential danger of the Indian Point reactor requires your IMMEDIATE ATTENTION. Shut it off and keep it off. Thank you.
