Subject: Outlier Resolution Completion Date Change Regarding USI A-46,
"Seismic Qualification of Equipment in Operating Plants"

Reference: Con Edison Letter to USNRC dated December 31, 1996

Consolidated Edison Company of New York, Inc. (Con Edison) provided, via the referenced letter, a Summary Report for Resolution of USI A-46, Seismic Qualification. Within our December 31, 1996 letter, Con Edison estimated a date to resolve all outliers as described within the summary report, by the end of the 1999 Refueling Outage.

Due to an unscheduled maintenance outage occurring in 1997 and extending through 1998 there was no refueling outage in 1999. Therefore, our prior plans to resolve all USI A-46 outliers by the end of the 1999 Refueling Outage were not met. Con Edison has established a new refueling outage start date of no later than June 3, 2000. Consequently, the resolution of these outliers is now planned be completed by the end of the 2000 Refueling Outage.

No new regulatory commitments are being made by Con Edison in this correspondence. Should you or your staff have any concerns regarding this matter, please contact Mr. John McCann, Manager, Nuclear Safety & Licensing.

Very truly yours,

A. Alan Blind
