NRC SEEKS NOMINATIONS FOR ADVISORY COMMITTEE ON
THE MEDICAL USES OF ISOTOPES

The Nuclear Regulatory Commission is inviting nominations of qualified individuals to serve a two-year term as a member of the Commission's Advisory Committee on the Medical Uses of Isotopes.

The committee advises the NRC on policy and technical issues that arise in regulating the medical use of radioactive byproduct material for diagnosis and therapy. It also provides guidance and comments on changes in NRC regulations and guides on medical uses; evaluates certain non-routine uses of radioactive byproduct material for medical uses; and provides technical assistance in specific licensing, inspection and enforcement cases.

The present members of the committee are physician specialists in therapeutic radiology and nuclear medicine (with backgrounds in radiology, internal medicine and nuclear cardiology); a nuclear medicine technologist; a radiopharmacist; specialists in medical physics; a patient's rights and care advocate; an individual with experience in State regulation of radioisotopes; and a representative from the Food and Drug Administration.

The Commission is seeking a qualified individual in the area of State regulation of radioisotopes.

Nominees must be U.S. citizens and be able to devote approximately 80 hours per year to committee business. Members are compensated and reimbursed for travel (including per diem in lieu of subsistence), secretarial and correspondence expenses.

Nominations (including a resume describing educational and professional qualifications and a current address and telephone number) should be sent to the Secretary of the Commission, Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Advisory Committee Management Officer.
