NOMINATIONS INVITED FOR NEW MEMBER OF
NRC'S NUCLEAR SAFETY RESEARCH REVIEW COMMITTEE

The Nuclear Regulatory Commission is inviting nominations for membership on the NRC's Nuclear Safety Research Review Committee. Nominees should be members of the nuclear community with expertise in advanced instrumentation and controls, including the human interface.

The Committee advises the Director of Nuclear Regulatory Research--and through him the Commission--on the quality and conduct of NRC research activities and gives recommendations concerning the overall management and direction of the nuclear safety research program.

The twelve-member committee is composed of senior experts in nuclear engineering or science capable of providing technical advice on the broad range of topics that are the subject of nuclear safety research for nuclear power plants and other facilities. Maintaining balance and diversity of experience, knowledge and judgement is an important consideration in the selection of members. Committee members serve a two-year term and may be reappointed for up to two additional two-year terms.

Over the next two years, the Committee will be examining such issues as quality of nuclear safety research relative to the needs of the users of the research products, the long-range direction of the nuclear safety research programs, the peer review process of research products and the capability of individuals and facilities where nuclear safety research is conducted.

Nominations are being sought for one vacancy on the committee. Nominees for the vacancy should be specialists in the area of advanced instrumentation and controls, preferably including digital instrumentation and control hardware and software and human factors in their application.

Selection for membership will be based on demonstrated capability and professional accomplishment in the indicated area

of specialization, in the conduct or management of scientific or engineering research and in applying research to nuclear safety issues.

Suggestions for nominations must include a resume describing the educational and professional qualifications of the nominee and the nominee's current address and daytime telephone number. Nominees must be U.S. citizens and be able to devote about 80 hours per year to committee business.

Nominations should be submitted not later than August 27, 1993, and should be addressed to the Secretary of the Commission, Attention: Advisory Committee Management Officer, Nuclear Regulatory Commission, Washington, D.C. 20555.
