Toms River, NJ 08757  
February 12, 2000

Dear Chairman Merserve:

RECEIVED BY We live within the 10 mile radius of the Oyster Creek  
IN 1000 0 NuclearPower Plant in Forked River. We are greatly concerned  
for our safety because GPU is planning to sell this aging plant  
to AmerGen. This plant has numerous safety concerns and should  
be shut down before a nuclear accident occurs. We feel it is  
in the best interests for all of us effected by this sale, to  
continue the decommissioning of the plant by GPU.

We support the Nuclear Information and Resource Service (NIRS)  
petition to intervene in the Oyster Creek license transfer,  
and are against any operation by AmerGen of U.S. reactors.

Sincerely,

*Joyce Kuschwara*
