

No. 94-32
Tel. 301/504-2240

FOR IMMEDIATE RELEASE
(Thursday, February 24, 1994)

NOTE TO EDITORS:

The Nuclear Regulatory Commission has received the two attached letter-type reports from its independent Advisory Committee on Reactor Safeguards. The reports provide comments on diversity in nuclear power plants and proposed amendments to the NRC's Part 73 rule to protect against malevolent use of vehicles at nuclear power plants.

In addition, the NRC's Executive Director for Operations has received a letter report on three issues relating to the NRC's Part 52 rule for the design certification process for advanced light water reactors.
