PROPOSED RULE **PR** 20
(64FR35090)

March 9, 2000

Mr. Dennis Rathbun
Office of Congressional Affairs
Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, Maryland 20852

100 APR -7 P2:20

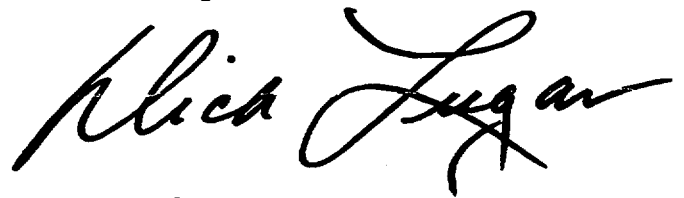

Dear Mr. Rathbun:

Because of the desire of this office to be responsive to all inquiries and communications, your consideration of the attached is requested.

Your findings and views, in duplicate form, along with the return of the enclosure, will be greatly appreciated. Please direct your reply to the attention of Darlee McCollum of my Washington office.

Thank you for your thoughtful attention.

Sincerely,

Richard G. Lugar
United States Senator

Chairman Richard Meserve
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

JB

Dear Chairman Meserve,

We are alarmed to hear that BNFL (British Nuclear Fuel) wants to recycle radio-active waste metals from Oak Ridge Uranium Enrichment Facility — and that these metals would actually be used in everyday household products — even children's toys! As citizens we insist that no radio-active substances are ever recycled and used in any way that exposes any life forms to radiation. Better solutions to this horrible problem of nuclear waste disposal must be found!

Sincerely,
Joseph & Bette Rubinstein

Dear Honorable Senator Lugar,

I am writing to demand that no contaminated materials reach the consumer marketplace. It has come to my attention that the DOE has made allowances for the sale and recycling of some 120,000 tons of contaminated materials from Oak Ridge. This is a horrifying prospect-will we all need geiger counters to protect ourselves?!! Please support a "zero tolerance" policy against the release of this kind of contaminated material.

Thank you for your thoughtful attention to this matter.

Sincerely,

Anna Cicirelli
