NRC STAFF PLANS PERFORMANCE REVIEW AT WESTINGHOUSE  
FUEL PLANT IN COLUMBIA, SOUTH CAROLINA

Meeting Is Open to Public Observation

The Nuclear Regulatory Commission staff will hold a meeting with officials of the Westinghouse commercial nuclear fuel facility in Columbia, South Carolina, at 1:30 p.m. (EST) on Thursday, February 28, to discuss the plant's performance in the area of safety programs and current operations.

NRC officials will discuss with Westinghouse a Plant Performance Review performed by the agency in which performance in ten functional areas was reviewed for a period from January 1, 1994, through December 7, 1995.

The NRC review concludes that the plant "exhibited a good level of performance" in all areas reviewed, but that additional management attention is needed in areas where performance was affected by lack of compliance with procedures.

The meeting is open to interested members of the public and the press for purposes of observation.
