Chairman Richard A. Meserve
Commissioner Nils J. Diaz
Commissioner Greta J. Discus
Commissioner Edward McGaffigan, Jr.
Commissioner Jeffrey S. Merrifield
United States Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Dear Chairman Meserve and Commissioners:

We, the elected officials who represent those within a ten mile radius of Con Edison's Indian Point 2 nuclear plant in Buchanan, demand that the utility replace its steam generators now in the wake of the February 15 radioactive leak. We call on the Nuclear Regulatory Commission to take whatever action it can to achieve this result.

Nearby Indian Point 3 operated by the New York Power Authority replaced its same Westinghouse manufactured steam generators in 1989 at a cost of \$110 million. Meanwhile, Con Ed's equipment continues to operate over these past 25 years as the oldest Westinghouse generators of the kind in the country.

We who live in the area are concerned about our health and safety. Repeated servicing of these aging generators has not prevented a significant level 2 radioactive leak from occurring. We believe that the answer is to stop fixing and start installing the new generators that are already on site.

Sincerely,

A handwritten signature in cursive script that reads "Frances C. Mullin".

Frances C. Mullin, Town Clerk
Town of Stony Point
