Subject: Docket No. 71-9070

Ms. Shankman,

Packaging Technology has attempted to obtain the fabrication data packages from the previous certificate owner, as well as registered users, and other companies that purchased these units. We have been unable to locate the fabrication records for the N-55 units, except as identified below, and believe that we have exhausted all of our resources. Packaging Technology recognizes that N-55 transportation packages for which fabrication records cannot be located are not in compliance with the licensing requirements of 10 CFR 71.91(c).

Therefore, Packaging Technology is providing notification that in accordance with the requirements of 10 CFR 71.91(c) the quality assurance records required for fabrication are currently limited to N-55 package S/N PT-001, fabricated by Packaging Technology, January 21, 1999. Packaging Technology will maintain the fabrication records for this unit to the aforementioned requirements.

Please identify any additional actions that Packaging Technology needs to perform to address this situation.

If you need additional information, please call (253) 922-1450 x-42, or e-mail at bcounterman@pactec-tn.com.

Sincerely,

Bernard Counterman
Quality Assurance Manager
Packaging Technology, Inc.
