U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555-0001

Subject: Report Required by Environmental Protection Plan

Dear Sir:

The Crystal River Unit 3 (CR-3) Environmental Protection Plan (EPP), Appendix B of the CR-3 Operating License, establishes reporting requirements related to the National Pollutant Discharge Elimination System (NPDES) Permit. Section 3.2.4 of the EPP requires that NRC be provided with copies of proposed changes to the NPDES permit.

By letter dated January 27, 2000, FPC informed the NRC of a proposed change to modify reporting requirements for oil and grease limits at internal plant outfalls. FPC is now withdrawing the request for this proposed change. The attached April 13, 2000, letter to the State of Florida Department of Environmental Protection (DEP) provides the information on the withdrawal.

There are no new regulatory commitments made in this submittal.

If you have any questions regarding this submittal, please contact Mr. Sid Powell, Manager, Nuclear Licensing at (352) 563-4883.

Sincerely,

S. L. Bernhoft
Director, Nuclear Regulatory Affairs

Tallahassee, FL 32399-2400

Dear Ms. Parker-Garvin:

Re: Florida Power Corporation Crystal River Unit Three
NPDES Permit Number FL0000159
Minor Permit Revision

Florida Power Corporation (FPC) requested a minor permit revision on January 27, 2000, to the above referenced permit to properly reflect internal monitoring requirements as report only. After further review and discussion, FPC would like to withdraw this request at this time. FPC believes the requested change is warranted, however, FPC would like to address this issue at a later date, possibly during the next permit renewal.

Your consideration of these requests is greatly appreciated. Please contact me at (727) 826-4283 if you have any questions or comments.

Sincerely,
