NRC, SUPPLY SYSTEM OFFICIALS TO DISCUSS  
PERFORMANCE AT WNP-2

Nuclear Regulatory Commission staff will meet next week with officials of the Washington Public Power Supply System to discuss efforts towards improved performance at the Washington Nuclear Project-2 (WNP-2) outside Richland, Wash.

The meeting will be at 1:30 p.m. on Thursday, Nov. 6, at the Supply System office at 3000 George Washington Way in Richland. It will be open to the public for observation; NRC officials will be available after the meeting for questions.

The session is one in a series between Supply System officials and a special NRC oversight panel the agency created in September 1995 to monitor and assess the Supply System's efforts to improve performance at WNP-2.
