PG&E Letter DCL-00-060

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555-0001

Docket No. 50-275, OL-DPR-80  
Docket No. 50-323, OL-DPR-82  
Diablo Canyon Units 1 and 2  
Supplement 2 to License Amendment Request 00-01, "Administrative Revisions  
to the Improved Technical Specifications"

Dear Commissioners and Staff:

On March 16, 2000, PG&E submitted License Amendment Request (LAR) 00-01 in PG&E Letter DCL-00-041. This LAR requested various changes to correct errors identified during the implementation of the Improved Technical Specifications (ITS) issued in License Amendments 135 and 135 for Units 1 and 2, respectively. On April 11, 2000, PG&E submitted PG&E Letter DCL-00-056 to provide additional detail regarding the history of several changes requested in LAR 00-01.

Following discussion with the NRC regarding LAR 00-01, it was identified that a proposed change to ITS page 5.0-32 to remove brackets from TS 5.7.2a.1 had not been formally requested. The purpose of this letter is to formally request the deletion of the brackets as indicated on marked-up ITS page 5.0-32 in LAR 00-01.

The brackets on ITS page 5.0-32 were inadvertently left in the final version of the ITS. They were included in TSTF-258 (from which the text in the ITS originated) to indicate plant specific information. The brackets should have been deleted in the final version of the ITS since the plant specific information had been inserted.

Additionally, item A.1.i of Enclosure 1 to DCL-00-056 referenced request for additional information (RAI) number DC 3.3-006. A more appropriate reference is RAI number DC-All-005 in PG&E Letter DCL-98-167.

ADD 1/1

The changes proposed in this supplement are administrative and do not affect the proposed TS pages or the no significant hazards consideration provided in PG&E Letter DCL-00-056.

Sincerely,

A handwritten signature in black ink, appearing to read "D.H. Oatley". The signature is written in a cursive, somewhat stylized font.

David H. Oatley
